

Heartland Institute Anti-science Propaganda

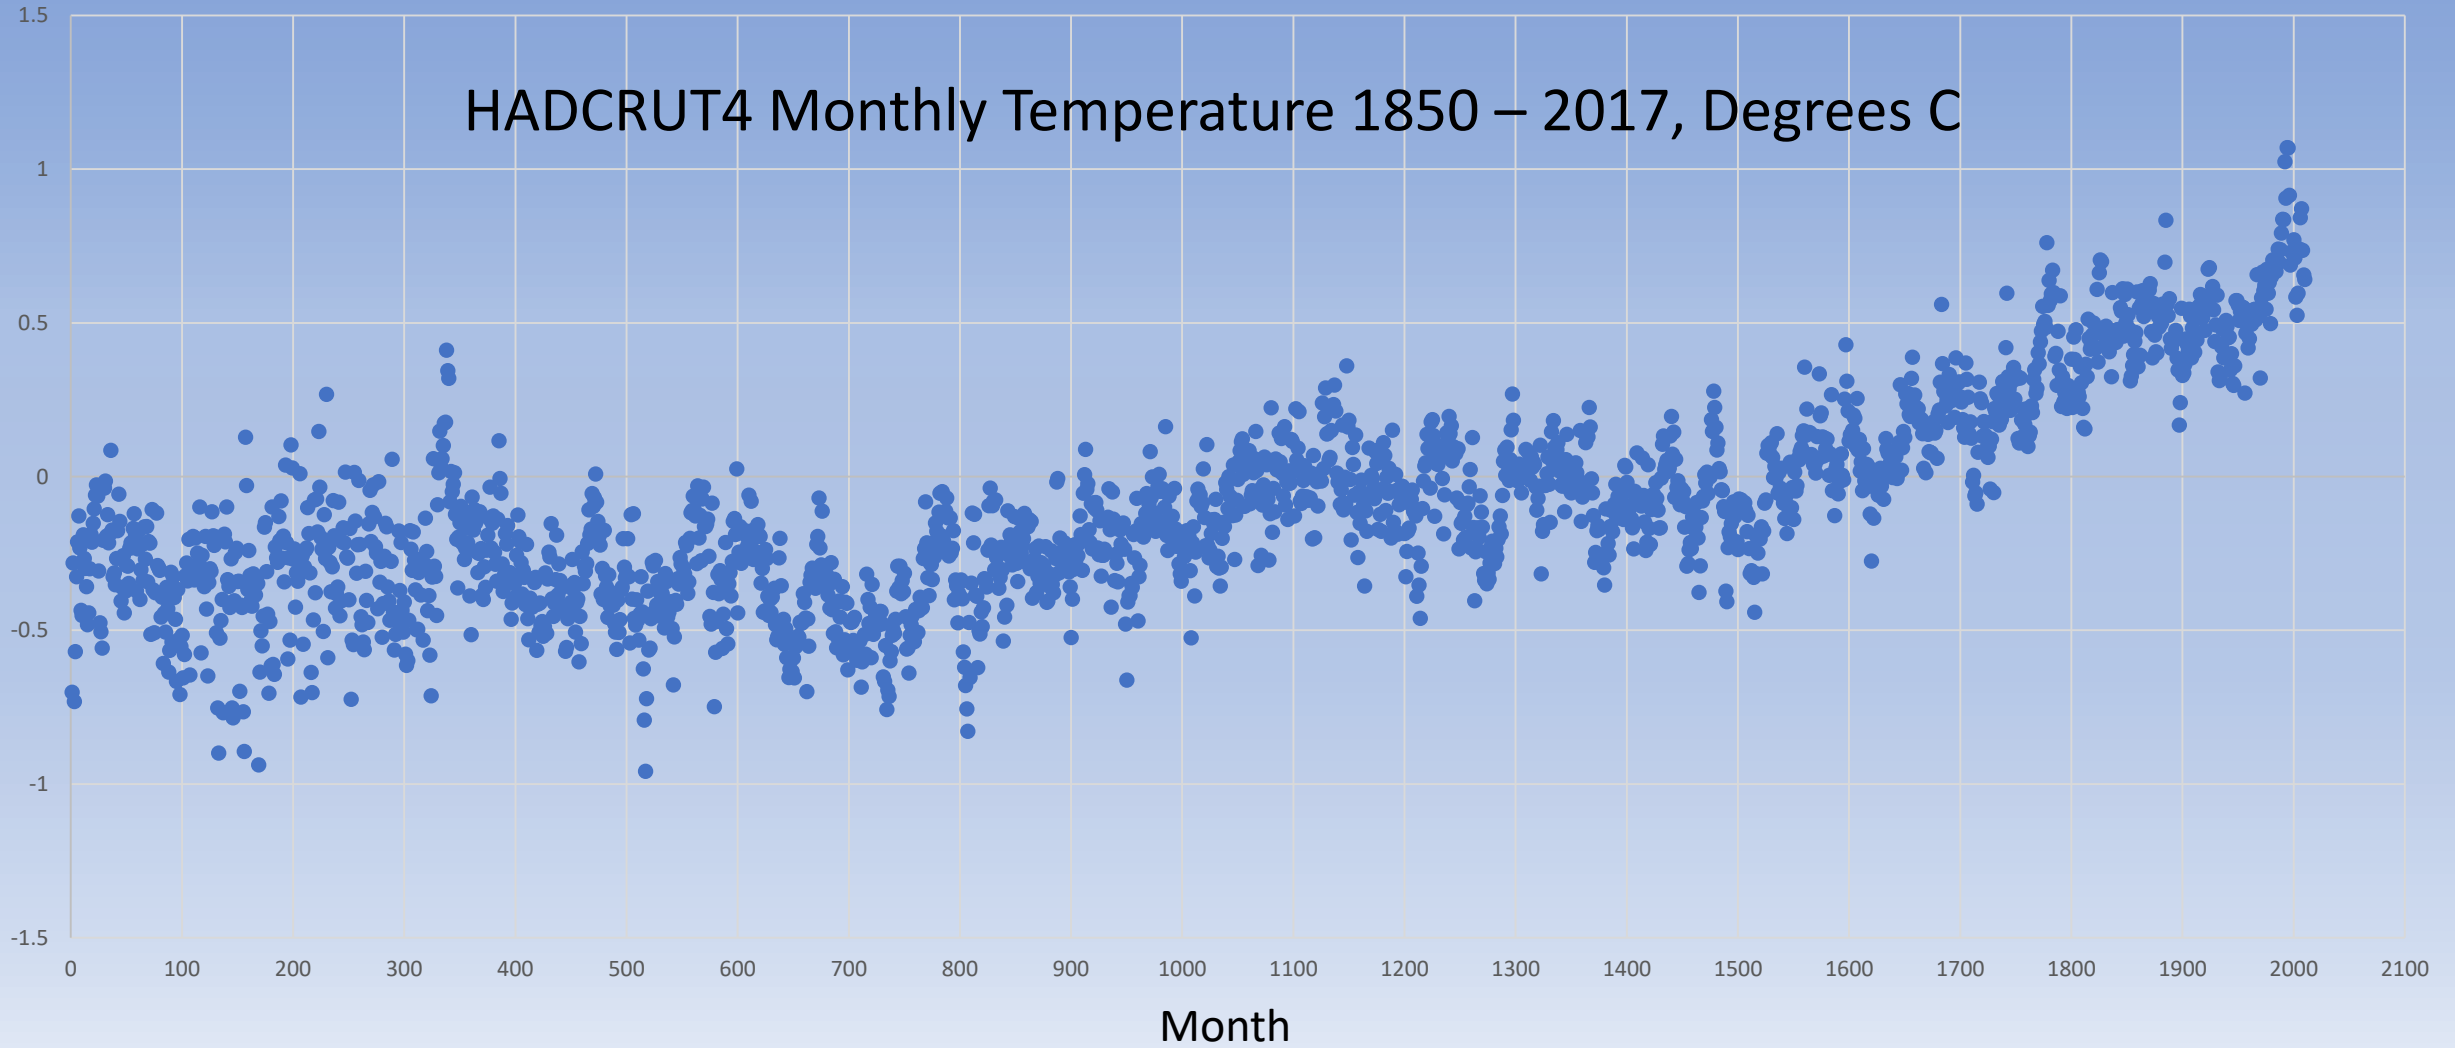

- Has anyone received this?
- What is the Heartland Institute?
- “Its mission is to discover, develop, and promote free-market solutions to social and economic problems.” <https://www.heartland.org/about-us/>
 - Note: nothing about environment, scientific understanding, or accuracy.
- Like the Creationists they focus on trying to pick holes in the accepted scientific consensus rather than presenting any unified view.
- Probably because they don't have one.
- Great critique written by Georgia HS environmental science teacher Brandie Freeman:
- <http://sustainableschoolteacher.blogspot.com/2017/04/an-open-letter-to-teachers.html>
