Confronting Climate Change

A

The Main Greenhouse Gases

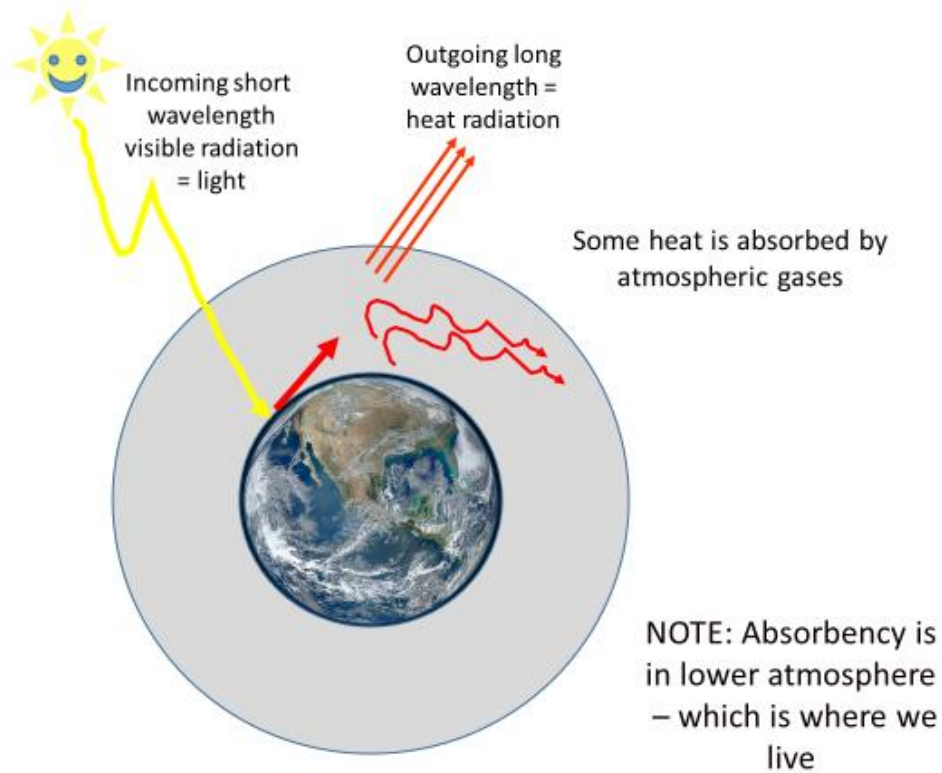

GWP = Global Warming Potential
Carbon dioxide Equivalent = CO₂e
Capacity of gas to absorb heat

The Transformation of Incoming Radiation into Outgoing Radiation

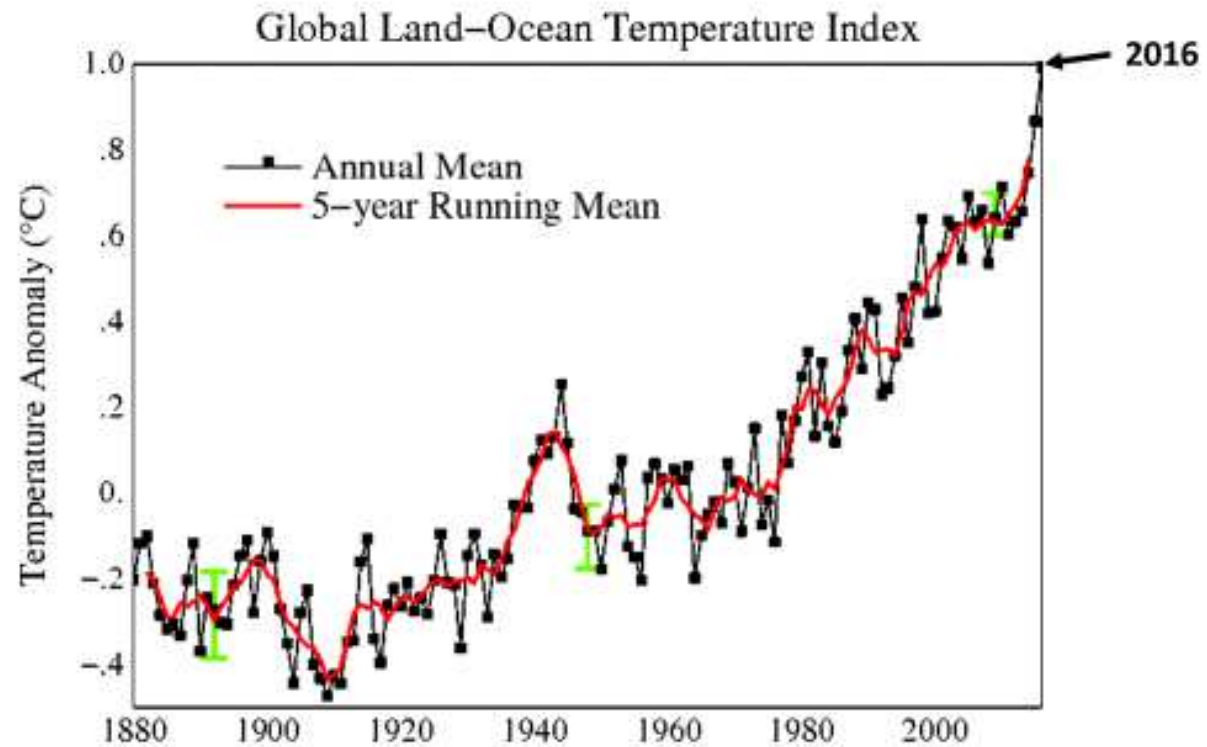

Depicting the solar radiation transformation that causes atmospheric warming

B

C

Global Temperatures 1880 – 2016

https://data.giss.nasa.gov/gistemp/graphs_v3/fig.A2.gif

The Transformation of Solar radiation with Increased atmospheric greenhouse gas concentration

Depicting how increasing atmospheric Greenhouse Gas concentration causes atmospheric warming
