Environmental Action

1. How do you strive to measure and reduce your businesses environmental impact?

- An environmental management program covering waste generation, energy usage, water usage, and greenhouse gas emissions
- A greenhouse gas emissions (carbon) footprint assessment
- Waste, energy, or water audits
- A written policy regarding environmental stewardship with specific goals, actions, and targets for the future
- We do not have methods in place to measure environmental impact
- Other:

2. If you selected any of the above options, please provide information on the results of measurement, and identify your plans for improvement

.....

3. How does your company measure and manage Green House Gas (GHG) emissions?

- Tracking renewable energy vs non-renewable energy consumed
- Tracking electricity, water and/or heat consumed
- Measuring the impact of company vehicles
- Measuring fossil fuels used on-site
- Measuring lifecycle emissions of products or services sold
- We do not have any mechanisms to measure our carbon footprint
- Other:

If you selected any of the above options, provide information on what you measure and the results

.....

4. Does your company set emission reduction goals? If yes, describe goals and efforts taken to meet them

No

.....

5. Have any public commitments been made to reduce emissions? If yes, identify commitments and actions taken to meet them

No

.....

6. Does your business take any of its energy from renewable resources?

- Wind energy
- Solar energy
- Geothermal Energy
- Hydropower
- Bioenergy
- We do not use any forms of renewable energy
- Other:

Provide information on how your company interacts with the supply chain

Examples include but are not limited to the following questions. All questions do not need to be answered

7. Do you buy from local suppliers (within 100 miles of business) when possible?

- Yes
- No
- Unsure

8. If you answered yes to the above question, how much of your product is locally obtained?

- 0-20%
- 20-40%
- 40-60%
- 60-80%
- 80-100%
- Unsure

9. Do you prioritize suppliers that go through a third-party certification?

A certification must be independent (governed by a third party), transparent, standards-based, and have a verification process. Examples of these type of products are: Cradle-to-Cradle certification, Fair Trade certification, Global GAP, Forest Stewardship Council (FSC) certified, Green Seal, Marine Stewardship Council (MSC) certified, USDA Organic, CAFE, Rainforest Alliance, Bcorporation

- Yes
- No
- Other:

10. Do you have policies in place to ensure a living wage along the entire supply chain if products are purchased from outside the United States?

Yes

No

Other:

11. Provide any other relevant information regarding supply chain management:

.....

12. How does your product or service preserve or restore the environment?

We don't use chemicals, we try to build soil, our product stays within 38 miles of our farm

Option 1

Social Action

1. How do you ensure employee satisfaction?

- Employee feedback mechanisms
- Health and safety protection policies
- Employee support provided regarding COVID-19
- Job flexibility
- Strong company culture
- Other:
